

# An exciting tech career with a difference

## Using technology to connect people to safe and healthy workplaces

What if you could have all the excitement of working for a tech giant — the sprints, the agile problem solving, and the camaraderie — plus great work-life balance, competitive benefits, and a workplace culture that prioritizes your health and well-being?

That's what you'll get as a member of WorkSafeBC's Innovation and Technology team.

B.C.'s 2.6 million workers and 270,000 employers rely on WorkSafeBC to help keep workplaces safe. Join us to make a difference to them.

When you join our Innovation and Technology (I&T) division, you're joining a collaborative ecosystem of architects, engineers, analysts, designers, specialists, advisors, and more. What we do is important, and so are the people we do it for.

### What we do

- Develop and support apps that help keep British Columbians safe at work
- Make it easy for people who are injured on the job to report their injury online
- Create user-friendly portals for workers, employers, and health care professionals
- Introduce and maintain the technologies WorkSafeBC staff use to help British Columbians every day

 **89%** of our employees say **the people they work with care** about providing the best service they can to our clients.\*

Our I&T division **works across 6 specialized departments.**

## Great minds work alike

Finding solutions to the health and safety problems facing B.C. workers and employers calls for innovative thinkers. We invest in good ideas and the people who drive them forward.

“Through initiatives like our test kitchen, we are changing the way our employees can participate in and lead innovation.”

— **Todd Yule**, head of Innovation and Technology

## What your future teammates say

“My journey in IT has involved a variety of moves, ranging from administration, quality assurance, development, and now architecture. I’m fortunate to work in an organization that provides stability along with opportunities for learning and professional development.”

— **Gary Lam**, enterprise architect

“I find WorkSafeBC is a great place for career evolution and growth. We encourage everyone to try new things and share their ideas so that we can improve and make a real difference.”

— **Chanell Axsel**,  
Innovation Services manager

## How we work

In I&T, we:

- Use an agile DevOps methodology
- Have prioritized full migration to Azure cloud
- Capitalize on predictive analytics, machine learning, and AI to improve services
- Focus on continuous learning (in-depth training, coding boot camps, etc.)
- Operate under a hybrid model (in office and work from home days)

## The tech we use

- Azure DevOps Services (e.g., Azure Pipelines)
- Yet Another Markup Language (YAML)
- Flutter
- GitHub
- PowerShell
- Visual Studio
- Dozens of other tools and programs
